

SD-7 Type Laser Protective Eyewear

SD-7 laser protective eyewear is designed to absorb special laser wave to provide safe working condition to our custom. The lenses of the eyewear are made of one kind of macromolecule and absorbing dyes. The optical properties of the lens meet all the demand of the standard EN207:1998+A1:2002. To provide minimum pressure and maximum comfort to the user, the product is special designed carefully.

The key parameter of the lenses

lens type	lens color	lasers	wavelength (nm)	light trans (%)	O.D.
SD-7	orange	Excimer	190-380	75	4+
		Argon	488		

Warning:

- 1) The laser protective eyewear **NOT** be use against other kind of laser that specified above.
- 2) **DO NOT** directly look into the laser beam even wearing this laser protective eyewear.
- 3) **DO NOT** cleaning the product with acid, alkali, organic solvent.
- 4) **DO NOT** store under the direct sunlight, high temperature.
